Education

Government Engineering College, Bilaspur

Expected 2028

Bachelor of Technology in Information Communication Technology

CGPA: 8.0/10

Relevant Coursework: Data Structures, Database Management Systems, Web Engineering, Cloud Computing

Technical Skills

- **Languages:** C++, JavaScript (ES6+), TypeScript, SQL
- **Frontend:** React.js, Next.js, Tailwind CSS, HTML5, CSS3, Zustand
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** PostgreSQL, MongoDB, Redis
- **DevOps & Infrastructure:** Docker, Nginx, AWS EC2, AWS S3
- **Tools:** Git, GitHub, Postman, Axios, npm

Experience

JobLuxe

Apr 2026 – May 2026

Web Developer Intern

- Developed reusable MERN-stack features using modular architecture across multiple application workflows.
- Designed and implemented secure REST APIs using Express.js with JWT-based authentication.
- Optimized backend API performance and MongoDB queries to improve application responsiveness.
- Collaborated on frontend-backend integration across multiple application modules and workflows.

Projects

Scalable URL Shortener

Node.js, Express.js, TypeScript, PostgreSQL, Redis, Docker, Nginx, JWT

- Engineered a production-oriented URL shortening service using Node.js, Express.js, and TypeScript with RESTful APIs for URL creation, redirection, management, and expiration.
- Designed PostgreSQL persistence for URL metadata with efficient indexed lookups for short URL resolution.
- Integrated Redis caching to reduce repeated database lookups for frequently accessed URLs.
- Implemented JWT-based authentication to secure user-specific URL creation and management operations.
- Configured Nginx as a reverse proxy for routing incoming requests to backend services.
- Containerized application services using Docker for reproducible development and deployment environments.
- Implemented URL expiration and automated cleanup to prevent stale links from accumulating in persistent storage.
- Developed a CLI interface for interacting with the service and enhanced terminal output using Chalk.

Food Fiesta

MongoDB, Express.js, React.js, Node.js, JWT

- Architected and developed a full-stack food delivery platform with authentication, cart management, and order processing.
- Designed RESTful APIs for menus, users, carts, and orders using Node.js and Express.js.
- Implemented secure JWT authentication and integrated a payment workflow.
- Optimized MongoDB queries and backend API performance with scalability and responsiveness in mind.
- Developed a responsive frontend using React.js and Tailwind CSS.

TypeLearn

React.js, Node.js, Zustand

- Developed an interactive typing platform with real-time WPM, accuracy, and error analytics.
- Implemented Zustand for efficient client-side state management and responsive UI updates.
- Built a responsive desktop and mobile interface with a focus on usability and frontend performance.

Achievements

- **2nd Runner-Up** in TechSprint, Government Engineering College, Bilaspur.
- **Top 10 Finalist** at IIIT Naya Raipur E-Summit Hackathon.
- Solved **210+** **Data Structures and Algorithms** problems on LeetCode.
